

**BUGAEV NIKOLAY VASILIEVICH**, 69 years old. Lives in the village of Kamyshevakha, Luhansk region, in a private house. The military conflict negatively affected to the health of Nikolai Vasilievich. He got serious health problems - blockage of arteries in his legs. In 2019, he underwent complicated surgery to amputate his left leg above the knee. Due to difficulties with transportation to hospitals for the passage of medical commission Nikolai could not get disability status. The problems of an older person were voiced at an ADTWG, which was attended by representatives of different humanitarian organizations and the Department of Social Protection of the Luhansk region. As a result of the joint actions of HelpAge and Department of social protection of Luhansk oblast, Nikolai Vasilyevich received a wheelchair, was able to return to a full life and became more mobile.

Since the beginning of the pandemic COVID -19 Nikolai`s life changed. The village has only FAP (feldsher-midwife station) and the nearest hospital is in the city of Lisichansk to which alone he cannot reach. Also, if necessary, the pharmacy may not have the necessary drugs to treat the infection.

As part of the HelpAge Canada project, Nikolai Vasilievich received a hygiene kit. During COVID - 19 humanitarian assistance for Nikolai Vasilyevich very necessary as he cannot alone, you walk out of the house to acquire the means of disinfection and hygiene. Now he has the opportunity for three months to clean his home with disinfectants against coronavirus infection, observe personal hygiene and follow the recommendations of medical workers.
